Preparation

1. Select the photo cards needed for this activity. The numbers of the cards are written below.
2. Print the activity sheets in seven different colours, one for each *Deai* student.
3. Cut the activity sheets into strips for each piece of information, e.g. family, school etc.
4. Put the strips for each category together and fasten them with a band or clip.

Activity

1. You can make a maximum of seven groups. The number of students in each group will depend on your class size.
2. Spread out all the family photos on a desk in the middle of the room.
3. Give a piece of paper with a family description to each group. The same group will receive the description of the same *Deai* student for each different category, but teachers should not tell the students this.
4. Check that each group has the right photo after every group has selected.
5. Next put all the sports photos on the desk and give the groups the piece of paper with the sports description.
6. Continue in this way until students have collected cards for each category.
7. Then have each group introduce their *Deai* student to the other groups showing their photo cards as they speak. Students can read the description or they can make up their own version according to the explanation on the back of each photo. Members of the group should take turns to describe the photos.
8. Finally, have students write about themselves using the same headings.
